

### REMARKS

As indicated in the Notice of Allowance and Fee(s) Due, the present application, which includes claims 10-18, is allowed for issuance as a patent.

For purposes of clarification and proper protection of the invention, Applicants respectfully note that page 3 of Applicants' Amendment dated September 20, 2004, contains a clerical error. More specifically, the preamble of amended claim 10 accurately recites Applicants' intended language, namely, "A method of making a coating comprising." However, amended claim 10 does not properly illustrate the deletion of the word "composition" by way of double bracketing or strikethrough. Applicants respectfully submit that claim 10 should have been set forth in the Amendment as follows:

10. (Currently Amended) A method of making a coating ~~composition~~ comprising:  
    providing a formaldehyde resin;  
    providing a ~~polyamide~~ formaldehyde scavenger, the  
    formaldehyde scavenger being a polyamide; and  
    combining the ~~formaldehyde resin and polyamide~~  
    scavenger;  
    heating the resin and scavenger at a temperature in the  
    range from about 450°F to about 650°F.

In an effort to make publication of the patent accurate, Applicants have consolidated all previous versions of the allowed claims and submit herewith a single clean set of claims.

Applicants respectfully request entry of the clean version of the allowed claims and issuance of the Patent.

Respectfully submitted,
